Objective: Programmer Analyst.

SUMMARY

Systems Analyst and Developer for over 2 years. I work with web programming in freelance projects, and currently, I provide my services to the company Intelligence Kapital, where I perform activities such as software creation and maintenance, generation of technical documentation, and system modeling.

TECHNOLOGIES

Java | Spring Boot | Swagger | MySQL | Hibernate | Php | React | Junit | Mockito

PROFESSIONAL EXPERIENCE

Intelligence Kapital

Programmer Analyst – 09/2022 - Present

- In my current role, I design and implement new websites, ensuring they are functional. In addition to maintaining existing sites, updating content to ensure everything is working correctly.
- I am also responsible for generating technical documentation for projects, software modeling. This includes writing requirement specifications, UML diagrams, and user manuals.
- Additionally, I have experience with Java, Spring Boot, Swagger, MySQL, Hibernate, and agile methodologies, such as Scrum and XP, which I use to manage projects efficiently and effectively.
